RE: Project Pre-Approval - GPOTPS1531628198

Dear Jason Sartain,

Thank you for your interest in the Georgia Power Commercial Energy Efficiency Program. This letter confirms our commitment regarding the proposed energy efficiency improvement at the facility located at 5401 Lake Oconee Pkwy. We have reviewed the application and are pleased to commit to an incentive of \$23,762.50.

This commitment is based on the accuracy of the application form, documents, and our technical review. Georgia Power Company may recalculate the final incentive amount or revoke this commitment if it determines that deviations in the types, amounts, costs or performance of any of the pre-approved energy efficiency measures change. All work is subject to a post-installation inspection before payment is issued.

This commitment is valid for 90 days from the date of this letter for retrofit projects and 1 year for new construction. If you need an extension of time for the project, you must contact your account manager using the contact information below.

If changes are made to the energy efficiency measures entered in your application, you must contact your account manager prior to implementing the changes to ensure that any additional work is eligible for incentives. Failure to share this information may delay or nullify the project's eligibility for an incentive. Contact information for your representative is listed below.

Thank you for your participation in the Georgia Power Commercial Energy Efficiency Program. Once the project is completed, please contact your Account Manager. If you need additional assistance, have questions, need a time extension or if you make any deviations from measures outlined in your application, contact your Account Manager, Patrick Dyer at 404-592-2290, and/or your Technical Support, Jeff West at 404-514-1111.

Sincerely,

Steve Morton
Manager, Commercial Energy Efficiency Program
Georgia Power
