RE: EUPMS, LLC – Power Optimization Solution

To Whom It May Concern:

We would like to take this opportunity to acknowledge EUPMS for exceeding our expectations in the development of their power optimization solution for St. Mary's Hospital in Athens, GA.

We completed the installation of the equipment in July 2011. Since then, the system produced approximately \$110,000 in electricity savings during the first 12 months of operation. We would especially like to thank Mr. Edmundo Duarte, President & CEO of EUPMS for his personal commitment and involvement in making our project a success.

I highly recommend the EUPMS power optimization solution to other facilities looking to reduce energy cost.

Sincerely,

A handwritten signature in black ink, appearing to read "Thomas J. Kruer", written in a cursive style.
