Re: Electrical Load Management and Power Optimization

Per occasion of European Power Management Systems Anniversary (EUPMS) we would like to congratulate the continuous contributions in energy conservation and rational use of resources, providing substantial electricity savings to Georgia Power clients with a proven and reliable Intelligent Demand Response Technology, that was assessed by an independent Auditor, certifying Georgia Power Rebates, under the Commercial Energy Efficiency Programs, hence approving a relevant incentive after positively reviewing the post-installation reliability, safety and accuracy of results.

The remote monitoring services and comprehensive monthly performance reporting, the extended warranty services and insurances, plus a recognized timely assistance, reveal EUPMS as a dependable partner in sustainability that we have the pleasure to endorse for improving energy efficiency and cost-reduction, an eligible technology for incentives in businesses sustainability endeavors, when electricity consumption needs to be addressed responsibly in a growing challenging market.

Georgia Power welcomes future business using EUPMS's proven technology, by subscribing its Commercial Energy Efficiency Program.

Sincerely
